

ThinkAhead Corporation Launches Diluta

The AI Productivity System Built Around Your Brain.

[Diluta](#) combines AI planning, chronotype intelligence, adaptive routines, and focus tools to help people plan smarter, focus deeper, and work with their natural energy patterns.

ThinkAhead Corporation Launches Diluta

A new productivity platform designed around human energy patterns, chronotypes, behavioral archetypes, and adaptive AI.

Las Vegas, Nevada - April 23, 2026 - ThinkAhead Corporation announced the launch of [Diluta](#), an AI-powered productivity platform built around chronotypes, behavioral archetypes, and adaptive planning. Rather than forcing users into rigid calendars and static task lists, Diluta helps people organize work around how they naturally focus, perform, and build momentum.

"Diluta was built around a simple belief: productivity should adapt to people - not the other way around."

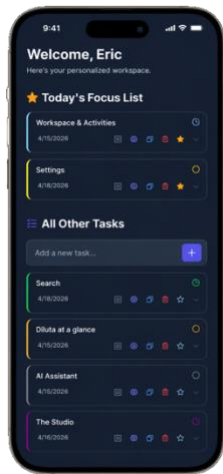

The platform helps users discover their chronotype, understand their productivity archetype, schedule high focus work during peak energy windows, create adaptive routines, and receive intelligent nudges through an integrated AI assistant.

Key product capabilities

AI Assistant	Task breakdown, next steps, and clarity prompts
Chronotype Intelligence	Planning that accounts for when users naturally focus
Smart Calendar	Day, week, schedule, and month planning
Focus Studio	Deep-work space with Pomodoro timing
Automations	Rules that reduce recurring busywork
Kanban Boards	Visual progress tracking for active workflows

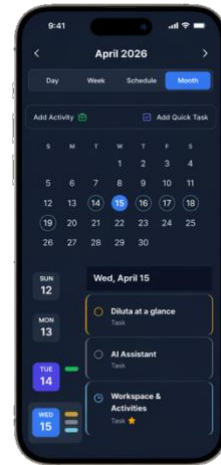

One system for focus, planning, automation, and momentum.

Diluta gives media and reviewers a clear product story: AI that helps people decide what to work on, when to work on it, and how to maintain flow.

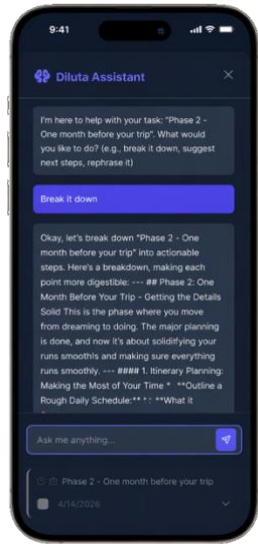

Dashboard

Personalized focus list, task status, and smart prioritization.

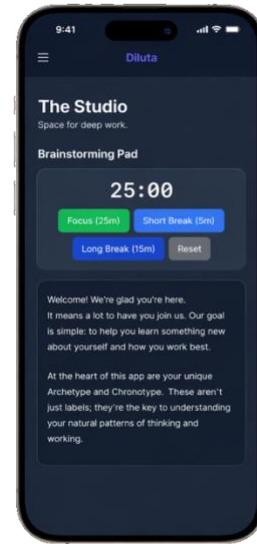

Smart Calendar

Month, week, schedule, and activity views that keep work visible.

AI Assistant

Breaks down tasks, suggests next steps to help users move forward.

Focus Studio

Pomodoro timing and deep work space for focused sessions for freedom of expression.

FOUNDER STORY

Eric Saint-Marc

Founder & CEO, ThinkAhead Corporation

Eric Saint-Marc founded ThinkAhead Corporation in 2020 with a vision to bring intelligence, clarity, and emotional relevance back into software. Diluta reflects that philosophy by combining AI with practical, human-centered productivity tools. For interviews, the strongest angle is founder-led: a builder who saw AI as a human experience layer long before it became mainstream.

Why media should care

- AI with real-world utility, not just hype
- Unique chronotype and productivity archetype angle
- Visually strong consumer software story
- Founder-led narrative with long-term AI perspective
- Clear consumer productivity angle with future team potential
